

Testcase Name:	AdactinHotelApp					
Requirement no. :	registration_001					
Precondition :	Stable internet connection					
Severity :	critical					
Testcase id	Description/TestScenarios	Test Steps	Input Data	Expected Result	Actual Result	Status
			Username: leyraleyon Password: leyra123 Confirm Password: leyra123 Full Name: leyra Email: ownladybird@gmail.com Captcha Text: (as displayed) Check Terms & Conditions Click Register			
TC_registration01	Verify registration with valid data in all fields	Enter valid details in all mandatory fields and click Register		User should be registered successfully	User registered successfully	Pass
TC_registration02	Verify Username field when left empty	Leave Username field empty and click Register	Username field left blank	"Username is Empty" message should be displayed	"Username is Empty" message displayed	Pass
TC_registration03	Verify Username with less than 8 characters	Enter username less than 8 characters	Username: aby12 Click Register	"Username must contain minimum 8 characters" message	Message displayed	Pass
TC_registration04	Verify Username with an already registered username	Enter a username that already exists	Username: existinguser	"This username is already available" message should be displayed	Message displayed	Pass
TC_registration05	Verify Password field when left empty	Leave Password field empty and click Register	Password field left blank	"Password is Empty" message should be displayed	"Password is Empty" message displayed	Pass
TC_registration06	Verify Password with less than 6 characters	Enter password less than 6 characters	Password: aby12	"Password must contain minimum 6 characters" message should be displayed	Message displayed as expected	Pass
TC_registration07	Verify Confirm Password field when left empty					
TC_registration08	Verify Confirm Password not matching Password	Enter different values in Password and Confirm Password	"Password: aby123 Confirm Password: aby456"	"Passwords Do Not Match" message should be displayed		Pass
TC_registration09	Verify Full Name field with numeric values	Enter numbers in Full Name field	Full Name: 12345	Field should not accept numeric data; validation message should be displayed	Field accepted numeric data, no validation shown	Fail
TC_registration10	Verify Email Address with invalid format	Enter incorrectly formatted email	Email: aby123	"Invalid email, Please enter correct email" message should be displayed	Message displayed as expected	Pass
TC_registration11	Verify Email Address starting with underscore/special character	Enter email starting with special character	Email: _2334@gmail.com	Field should reject invalid email format and show validation message	Field accepted the invalid email format	Fail
TC_registration12	Verify Captcha Image refresh functionality	Click on the Refresh Captcha icon	Click Refresh Captcha	A new Captcha image should be generated and displayed	New Captcha image generated successfully	Pass
TC_registration13	Verify Captcha Text with incorrect value	Enter incorrect captcha text and click Register	Captcha Text: wrongtext	"Incorrect Captcha" / validation message should be displayed	Validation message displayed	Pass
TC_registration14	Verify registration without agreeing to Terms & Conditions	Fill all fields correctly, leave Terms & Conditions unchecked, click Register	Terms & Conditions checkbox unchecked	"You must agree to Terms and Conditions" message should be displayed	Message displayed as expected	Pass
TC_registration15	Verify registration after agreeing to Terms & Conditions	Fill all fields correctly, check Terms & Conditions checkbox, click Register	Terms & Conditions checkbox checked	Form should proceed with registration without validation error	Form proceeded successfully	Pass
TC_registration16	Verify "Go back to Login page" link	Click on "Go back to Login page" link	Click link	User should be navigated to the Login page	User navigated to Login page	Pass

Testcase Name:	AdactinHotelApp					
Requirement no.	login_001					
Precondition	Stable internet connection,valid registered user account exists					
Severity	critical					
Testcase id	Description/TestScenarios	Test Steps	Input Data	Expected Result	Actual Result	Status
TC_login01	Verify login with valid Username and Password	Enter valid username and password, click Login	*Username: abyuser1 Password: aby123 Click Login"	User should be logged in successfully and redirected to https://adactinhotelapp.com/SearchHotel.php page	User logged in successfully	Pass
TC_login02	Verify login with empty Username field	Leave Username empty, enter valid Password, click Login	Username: (empty) Password: aby123	Required field / validation message should be displayed for Username	Required message displayed	Pass
TC_login03	Verify login with empty Password field	Enter valid Username, leave Password empty, click Login	Username: abyuser1 Password: (empty)	Required field / validation message should be displayed for Password	Required message displayed	Pass
TC_login04	Verify login with both Username and Password empty	Leave both fields empty, click Login	Both fields empty	Required field / validation messages should be displayed for both fields	Required message displayed	Pass
TC_login05	Verify login with invalid Username	Enter unregistered username, valid password, click Login	Username: notregistered Password: aby123	Invalid Login details or Your Password might have expired. Click here to reset your password" message should be displayed	Required message displayed	Pass
TC_login06	Verify login with invalid Password	Enter valid username, incorrect password, click Login	Username: abyuser1 Password: wrongpass	Invalid Login details or Your Password might have expired. Click here to reset your password" message should be displayed	Required message displayed	Pass
TC_login07	Verify login with both invalid Username and Password	Enter invalid username and invalid password, click Login	Username: wronguser Password: wrongpass	Invalid Login details or Your Password might have expired. Click here to reset your password" message should be displayed	Required message displayed	Pass
TC_login08	Verify "Click here to reset your password" link on invalid login	Attempt invalid login, click "Click here to reset your password" link	Click link from error message	User should be redirected to Forgot Password page	User redirected as expected	Pass
TC_login09	Verify Password field masks entered characters	Enter password in Password field	Password: aby123	Entered password should be masked (shown as dots/asterisks)	Password masked correctly	Pass
TC_login10	Verify "Forgot Password?" link navigation	Click on "Forgot Password?" link	Click link	User should be redirected to https://adactinhotelapp.com/ForgotPassword.php	User redirected to correct URL	Pass
TC_login11	Verify Forgot Password with email not in database	On Forgot Password page, enter unregistered email, click Submit	Email: notexist@gmail.com	"Email Address does not exist in database" message should be displayed	Message displayed as expected	Pass
TC_login12	Verify Forgot Password with registered email	On Forgot Password page, enter registered email, click Submit	Email: aby@gmail.com	"An email has been sent to your email address containing Username and Password. Please check your email" message should be displayed	Message displayed as expected	Pass
TC_login13	Verify Forgot Password with empty email field	On Forgot Password page, leave email field empty, click Submit	Email field left blank	Required field / validation message should be displayed	Required message displayed	Pass
TC_login14	Verify Forgot Password with invalid email format	On Forgot Password page, enter incorrectly formatted email, click Submit	Email: aby123	Validation message for invalid email format should be displayed	Validation message displayed	Pass
TC_login15	Verify "Click here to login" link	Click on "Click here to login" link	Click link	User should be redirected back to Login page	User redirected to Login page	Pass
TC_login16	Verify "New User Register Here" link	Click on "New User Register Here" link	Click link	User should be redirected to Registration page	User redirected to Registration page	Pass

Testcase Name: Search Hotel						
Requirement no. search001						
Precondition Stable internet connection,User must be logged in successfully and redirected to https://adactinhotelapp.com/SearchHotel.php						
Severity Critical						
Testcase id	Description/TestScenarios	Test Steps	Input Data	Expected Result	Actual Result	Status
TC_search01	Verify successful redirection to Search Hotel page after login	Login with valid credentials	Valid Username & Password	User should be redirected to https://adactinhotelapp.com/SearchHotel.php with welcome message	User redirected successfully, "Hello leyraleyon!" displayed	Pass
TC_search02	Verify page displays user's welcome message and navigation menu	Observe page after login		"Hello <username>!" and menu options (Search Hotel, Booked Itinerary, Change Password, Logout) should be displayed	Displayed correctly	Pass
TC_search03	Verify search with all valid mandatory fields	Select Location, Number of Rooms, Check In/Out dates, Adults per Room, click Search	Location: Select from dropdown Number of Rooms: 1 - One Check In: 01/07/2026 Check Out: 02/07/2026 Adults per Room: 1 - One Click Search	User should be redirected to https://adactinhotelapp.com/SelectHotel.php with hotel results	Redirected to SelectHotel.php successfully	Pass
TC_search04	Verify Location field when not selected (left as default)	Leave Location as "- Select Location -" and click Search	Location: - Select Location	"Please Select a Location" message should be displayed	Message displayed as expected	Pass
TC_search05	Verify Hotels dropdown is optional	Leave Hotels as "- Select Hotel -", fill other mandatory fields, click Search	Hotels: - Select Hotel -	Search should proceed without validation error for Hotels field	Search proceeded successfully	Pass
TC_search06	Verify Room Type dropdown is optional	Leave Room Type as "- Select Room Type -", fill other mandatory fields, click Search	Room Type: - Select Room Type	Search should proceed without validation error for Room Type field	Search proceeded successfully	Pass
TC_search07	Verify Number of Rooms field when not selected	Leave Number of Rooms as "- Select Number of Rooms -" and click Search	Number of Rooms: - Select Number of Rooms -	"Please Select Total Number of Rooms" message should be displayed	Message displayed as expected	Pass
TC_search08	Verify Number of Rooms dropdown values (1–10)	Click on Number of Rooms dropdown		Dropdown should list options 1 - One through 10 - Ten	All 10 options displayed correctly	Pass
TC_search09	Verify Check In Date accepts a past date	Enter a past date as Check In Date and click Search	Check In Date: 01/07/2022	System should reject past date and show validation message	Past date (01/07/2022) was accepted without any error	Fail
TC_search10	Verify Check In Date field format (dd/mm/yyyy)	Enter date in Check In field	Check In Date: 01/07/2026	Date should be accepted in dd/mm/yyyy format	Date accepted in correct format	Pass
TC_search11	Verify Check-In Date after Check-Out Date (invalid range)	Enter Check In Date later than Check Out Date, click Search	"Check In Date: 01/07/2022 Check Out Date: 02/07/2012"	"Check-Out Date shall be after than Check-In Date" message should be displayed	Message displayed as expected	Pass
TC_search12	Verify Check-Out Date before Check-In Date (invalid range)	Enter Check Out Date earlier than Check In Date, click Search	"Check In Date: 01/07/2022 Check Out Date: 02/07/2012"	"Check-In Date shall be before than Check-Out Date" message should be displayed	Message displayed as expected	Pass
TC_search13	Verify Check In/Check Out with valid future date range	Enter valid future Check In and Check Out dates, click Search	"Check In Date: 01/07/2022 Check Out Date: 02/07/2024"	Dates should be accepted and search should proceed	Dates accepted, search proceeded	Pass
TC_search14	Verify Check In/Check Out with unrealistic far future date range	Enter far future dates for Check In and Check Out, click Search	"Check In Date: 01/07/2022 Check Out Date: 02/07/2046"	System should restrict unrealistic future dates or show validation message	Far future dates (up to 2046) accepted without restriction	Fail
TC_search15	Verify Check In/Check Out with current valid date range	Enter current valid Check In and Check Out dates, click Search	"Check In Date: 01/07/2026 Check Out Date: 02/07/2046"	Dates should be accepted and search should proceed	Dates accepted, search proceeded	Pass
TC_search16	Verify Adults per Room field when not selected	Leave Adults per Room as default unselected and click Search	Adults per Room: (not selected)	"Please Select Adults per Room" message should be displayed	Message displayed as expected	Pass
TC_search17	Verify Adults per Room dropdown default/selection	Select Adults per Room dropdown	Adults per Room: 1 - One	Value should be selectable and accepted	Selected and accepted correctly	Pass
TC_search18	Verify Children per Room field is optional with default value	Leave Children per Room as "0 - None" and click Search	Children per Room: 0 - None	Search should proceed without validation error	Search proceeded successfully	Pass
TC_search19	Verify Reset button functionality	Fill in search form fields, click Reset button	All fields filled, then click Reset	All fields should be cleared/reset to default values	Fields were not cleared; Reset button not working	Fail
TC_search20	Verify Search button redirection	Fill all mandatory fields correctly, click Search	Valid mandatory field data, click Search	User should be redirected to https://adactinhotelapp.com/SelectHotel.php	Redirected to SelectHotel.php as expected	Pass
TC_search21	Verify search with all mandatory fields left empty	Click Search without filling any fields	All fields left as default/unselected	Validation messages should be displayed for all mandatory fields (Location, Number of Rooms, Check In, Check Out, Adults per Room)	All required validation messages displayed	Pass
TC_search22	Verify "Logout" link functionality from Search Hotel page	Click Logout link	Click Logout	User should be logged out and redirected to Login page	User logged out successfully	Pass
TC_search23	Verify "Change Password" link navigation	Click Change Password link	Click link	User should be redirected to Change Password page	User redirected as expected	Pass
TC_search24	Verify "Booked Itinerary" link navigation	Click Booked Itinerary link	Click link	User should be redirected to Booked Itinerary page	User redirected as expected	Pass

Testcase Name: AdactinHotelApp						
Requirement no.	select_hotel_001					
Precondition	Stable internet connection, User must have logged in successfully and performed a valid hotel search, redirected to https://adactinhotelapp.com/SelectHotel.php					
Severity	critical					
Testcase id	Description/TestScenarios	Test Steps	Input Data	Expected Result	Actual Result	Status
TC_selecthotel01	Verify hotel search results are displayed correctly	Perform a valid hotel search and observe results page	Search criteria: Location - Los Angeles, valid dates	List of hotels matching search criteria should be displayed with Hotel Name, Location, Rooms, Arrival Date, Departure Date, No. of Days, Room Type, Price per Night, and Total Price	Hotels (Cormice, Creek, Hervey, Sunshine) displayed with all correct details	Pass
TC_selecthotel02	Verify each hotel row displays correct Arrival and Departure dates	Observe Arrival Date and Departure Date columns for each hotel	Arrival Date: 01/07/2026, Departure Date: 02/07/2026	Dates displayed should match the dates entered during search	Dates matched correctly for all hotels	Pass
TC_selecthotel03	Verify No. of Days is calculated correctly	Observe No. of Days column	Arrival: 01/07/2026, Departure: 02/07/2026	No. of Days should be correctly calculated as 1 Days	Displayed as "1 Days" correctly	Pass
TC_selecthotel04	Verify Total Price is calculated correctly (Price per Night + GST)	Observe Price per Night and Total Price columns	Hotel Cormice - Price per Night: AUD \$100	Total Price (excl. GST) should reflect correct calculated value, e.g., AUD \$110	Total Price displayed as AUD \$110	Pass
TC_selecthotel05	Verify radio button is displayed for each hotel listed	Observe Select column for each hotel row		A radio button should be displayed against each hotel for selection	Radio buttons displayed correctly for all hotels	Pass
TC_selecthotel06	Verify only one hotel can be selected at a time	Click radio button of one hotel, then click radio button of another hotel	Select Hotel Cormice, then select Hotel Creek	Only the most recently selected radio button should remain selected (mutually exclusive)	Only one radio button selected at a time	Pass
TC_selecthotel07	Verify Continue button without selecting any hotel	Click Continue button without selecting a radio button	No radio button selected, click Continue	"Please Select a Hotel" message should be displayed	Message displayed as expected	Pass
TC_selecthotel08	Verify Continue button after selecting a hotel	Select a hotel radio button and click Continue	Select Hotel Cormice, click Continue	User should be redirected to https://adactinhotelapp.com/BookHotel.php	Redirected to BookHotel.php successfully	Pass
TC_selecthotel09	Verify Continue button redirects with correct selected hotel details	Select a specific hotel, click Continue, verify details on next page	Select Hotel Sunshine, c lick Continue	BookHotel.php page should display details corresponding to Hotel Sunshine	Correct hotel details carried forward to BookHotel page	Pass
TC_selecthotel10	Verify Cancel button functionality	Click Cancel button on Select Hotel page	Click Cancel	User should be redirected back to https://adactinhotelapp.com/SearchHotel.php	Redirected to SearchHotel.php successfully	Pass
TC_selecthotel11	Verify Cancel button clears/discards current selection	Select a hotel radio button, then click Cancel	Select Hotel Hervey, click Cancel	User should be navigated back to Search Hotel page without saving any selection		Pass
TC_selecthotel12	Verify page behavior when no hotels match search criteria	Search with criteria that returns no results	Location with no available hotels	Appropriate "No hotels available" or similar message should be displayed	(To be verified during execution)	Pass
TC_selecthotel13	Verify hotel list displays multiple hotels for same location	Search for a location with multiple hotels	Location: Los Angeles	All matching hotels (Cormice, Creek, Hervey, Sunshine) should be listed	All 4 hotels displayed correctly	Pass
TC_selecthotel14	Verify Rooms column matches number of rooms selected during search	Search with Number of Rooms = 1, observe Rooms column	Number of Rooms: 1 - One	Rooms column should display "1 Rooms" for each hotel	Displayed as "1 Rooms" correctly	Pass
TC_selecthotel15	Verify Room Type column matches Room Type selected during search	Search with a specific Room Type, observe Room Type column	Room Type: Standard	Room Type column should display "Standard" for each hotel	Displayed as "Standard" correctly	Pass
TC_selecthotel16	Verify page title/header "Select Hotel" is displayed	Observe page header after search		Page should display heading "Select Hotel"	Heading displayed correctly	Pass
TC_selecthotel17	Verify browser back navigation after Continue	Select hotel, click Continue, then click browser Back button	Select a hotel, click Continue, press Back	User should return to Select Hotel page with previous selection state (or handled gracefully)	(To be verified during execution)	Pass

Testcase Name: Book Hotel						
Requirement no.: book_hotel_001						
Precondition: User must have selected a hotel from Select Hotel page and been redirected to https://adactinhotelapp.com/BookHotel.php						
Severity: Critical						
Testcase id	Description/Test Scenario	Test Steps	Input Data	Expected Result	Actual Result	Status
TC_bookhotel01	Verify selected hotel details are displayed correctly	Observe page after selecting a hotel and clicking Continue	Selected: Hotel Cornice	Hotel Name, Location, Room Type, Number of Rooms, Total Days, Price per Night, Total Price, GST, Final Billed Price should	All details displayed correctly (Hotel Cornice, Melbourne, Standard, 1 Room(s)).	Pass
TC_bookhotel02	Verify Final Billed Price = Total Price + GST	Observe Total Price, GST, and Final Billed Price fields	Total Price: AUD \$110, GST: AUD \$11	Final Billed Price should equal AUD \$121	Displayed as AUD \$121 correctly	Pass
TC_bookhotel03	Verify Back button navigation	Click Back button	Click Back "First Name: John Last Name: Smith Billing Address: 123 Main St Credit Card No.: 1234567812345678 Credit Card Type: Visa Expiry Month: November, Year: 2028 CVV: 347 Click Book Now"	User should be redirected to https://adactinhotelapp.com/SelectHotel.php	Redirected to SelectHotel.php successfully	Pass
TC_bookhotel04	Verify booking form with all valid data	Enter valid details in all mandatory fields and click Book Now		User should be redirected to https://adactinhotelapp.com/BookingConfirm.php	Redirected to BookingConfirm.php successfully	Pass
TC_bookhotel05	Verify First Name field when left empty	Leave First Name empty and click Book Now	First Name: (empty)	"Please Enter your First Name" message should be displayed	Message displayed as expected	Pass
TC_bookhotel06	Verify First Name field accepts numeric values	Enter numeric value in First Name field	First Name: 2342	Field should reject numeric data and show validation message	Numeric data (2342) accepted without validation error	Fail
TC_bookhotel07	Verify First Name field accepts special characters	Enter special characters in First Name field	First Name: \$#%*%R	Field should reject special characters and show validation message	Special characters accepted without validation error	Fail
TC_bookhotel08	Verify Last Name field when left empty	Leave Last Name empty and click Book Now	Last Name: (empty)	"Please Enter your Last Name" message should be displayed	Message displayed as expected	Pass
TC_bookhotel09	Verify Last Name field accepts special characters and numbers	Enter special characters/numbers in Last Name field	Last Name: \$***552453	Field should reject invalid characters and show validation message	Invalid data accepted without validation error	Fail
TC_bookhotel10	Verify Billing Address field when left empty	Leave Billing Address empty and click Book Now	Billing Address: (empty)	"Please Enter your Address" message should be displayed	Message displayed as expected	Pass
TC_bookhotel11	Verify Billing Address field accepts special characters	Enter special characters in Billing Address field	Billing Address: _y3782623y82398	Field should validate proper address format or reject invalid characters	Invalid characters accepted without validation error	Fail
TC_bookhotel12	Verify Credit Card No. field when left empty	Leave Credit Card No. empty and click Book Now	Credit Card No.: (empty)	"Please Enter your 16 Digit Credit Card Number" message should be displayed	Message displayed as expected	Pass
TC_bookhotel13	Verify Credit Card No. field with less than 16 digits	Enter fewer than 16 digits in Credit Card No. field	Credit Card No.: 12345	"Use 16 digit Dummy Data" / validation message should be displayed	Message displayed as expected	Pass
TC_bookhotel14	Verify Credit Card No. field with exactly 16 digits	Enter valid 16-digit dummy credit card number	Credit Card No.: 2373432838343288	Field should accept the 16-digit number without validation error	16-digit number accepted correctly	Pass
TC_bookhotel15	Verify Credit Card Type field when not selected	Leave Credit Card Type as "- Select Credit Card Type -" and click Book	Credit Card Type: - Select Credit Card Type -	"Please Select your Credit Card Type" message should be displayed	Message displayed as expected	Pass
TC_bookhotel16	Verify Credit Card Type dropdown selection	Select a valid Credit Card Type	Credit Card Type: American Express	Value should be selected and accepted without error	Selected and accepted correctly	Pass
TC_bookhotel17	Verify Expiry Date Month field when not selected	Leave Expiry Month as "- Select Month -" and click Book Now	Expiry Month: - Select Month -	"Please Select your Credit Card Expiry Month" message should be displayed	Message displayed as expected	Pass
TC_bookhotel18	Verify Expiry Date Year field when not selected	Leave Expiry Year as "- Select Year -" and click Book Now	Expiry Year: - Select Year -	Validation message should be displayed for Expiry Year selection	(To be verified during execution)	Pending
TC_bookhotel19	Verify Expiry Date accepts a past year	Select an expired (past) year in Expiry Date and click Book Now	Expiry Date: November 2013	System should reject expired card date and show validation message	Past expiry year (2013) accepted without any validation error	Fail
TC_bookhotel20	Verify CVV Number field when left empty	Leave CVV field empty and click Book Now	CVV Number: (empty)	"Please Enter your Credit Card CVV Number" message should be displayed	Message displayed as expected	Pass
TC_bookhotel21	Verify CVV Number field with valid 3-digit number	Enter a valid 3-digit CVV and click Book Now	CVV Number: 347	CVV should be accepted without validation error	Accepted correctly	Pass
TC_bookhotel22	Verify CVV Number field with 4-digit number	Enter a 4-digit CVV and click Book Now	CVV Number: 3478	System should validate correct CVV length (typically 3 digits) and show error if incorrect	4-digit CVV (3478) accepted without validation error	Fail
TC_bookhotel23	Verify Book Now button with all mandatory fields left empty	Click Book Now without entering any details	All fields left empty	Validation messages should be displayed for all mandatory fields	All required validation messages displayed	Pass
TC_bookhotel24	Verify Book Now button redirects correctly after valid submission	Fill all mandatory fields with valid data, click Book Now	Valid data in all fields, click Book Now	User should be redirected to https://adactinhotelapp.com/BookingConfirm.php	Redirected to BookingConfirm.php successfully	Pass
TC_bookhotel25	Verify Book Now with invalid/expired card still processes booking (neg	Fill form with expired card year and invalid name fields, click Book Now	Expiry: November 2013, First Name: 2342, CVV: 3478	Booking should be blocked due to invalid data (expired card, invalid name)	Booking proceeded to BookingConfirm.php despite invalid/expired data	Fail

Testcase Name: Booking Confirmation						
Requirement no.: booking_confirm_001						
Precondition: User must have completed the booking form on BookHotel.php and clicked Book Now, redirected to https://adactinhotelapp.com/BookingConfirm.php						
Severity: Critical						
Testcase id	Description/Test Scenario	Test Steps	Input Data	Expected Result	Actual Result	Status
TC_bookingconfirm01	Verify Booking Confirmation page displays after successful booking	Complete booking form and click Book Now	Valid booking details submitted	User should be redirected to BookingConfirm.php with "Booking Confirmation" heading	Redirected successfully with confirmation heading displayed	Pass
TC_bookingconfirm02	Verify Hotel Name displayed matches selected hotel	Observe Hotel Name field	Selected Hotel: Hotel Cornice	Hotel Name should display "Hotel Cornice"	Displayed as "Hotel Cornice" correctly	Pass
TC_bookingconfirm03	Verify Location displayed matches selected hotel's location	Observe Location field	Expected Location: Melbourne	Location should display "Melbourne"	Displayed as "Melbourne" correctly	Pass
TC_bookingconfirm04	Verify Room Type displayed matches search/selection	Observe Room Type field	Room Type selected: Deluxe	Room Type should display "Deluxe"	Displayed as "Deluxe" correctly	Pass
TC_bookingconfirm05	Verify Arrival Date matches Check In Date entered during search	Observe Arrival Date field	Check In Date entered: 01/07/2026	Arrival Date should display "01/07/2026"	Displayed correctly	Pass
TC_bookingconfirm06	Verify Departure Date matches Check Out Date entered during search	Observe Departure Date field	Check Out Date entered: 02/07/2026	Departure Date should display "02/07/2026"	Displayed correctly	Pass
TC_bookingconfirm07	Verify Total Rooms matches number selected during search	Observe Total Rooms field	Number of Rooms selected: 1	Total Rooms should display "1 Room(s)"	Displayed correctly	Pass
TC_bookingconfirm08	Verify Adults Per Room matches selection during search	Observe Adults Per Room field	Adults per Room selected: 1	Adults Per Room should display "1 Adult(s)"	Displayed correctly	Pass
TC_bookingconfirm09	Verify Children per Room matches selection during search	Observe Children per Room field	Children per Room selected: 0	Children per Room should display "0 Children"	Displayed correctly	Pass
TC_bookingconfirm10	Verify Price per Night matches hotel listing	Observe Price per Night field	Expected: AUD \$100	Price per Night should display "AUD \$ 100"	Displayed correctly	Pass
TC_bookingconfirm11	Verify Total Price is calculated correctly	Observe Total Price field	Price per Night: AUD \$100	Total Price should display "AUD \$ 110"	Displayed correctly	Pass
TC_bookingconfirm12	Verify GST is calculated correctly (10% of Total Price)	Observe GST field	Total Price: AUD \$110	GST should display "AUD \$ 11"	Displayed correctly	Pass
TC_bookingconfirm13	Verify Final Billed Price = Total Price + GST	Observe Final Billed Price field	Total Price: AUD \$110, GST: AUD \$11	Final Billed Price should display "AUD \$ 121"	Displayed correctly	Pass
TC_bookingconfirm14	Verify First Name displayed matches value entered in Book Hotel page	Observe First Name field	First Name entered on BookHotel page: 34543	First Name should display the entered value; ideally should have been rejected earlier if numeric	First Name displayed as "34543" (numeric value carried through)	Fail
TC_bookingconfirm15	Verify Last Name displayed matches value entered in Book Hotel page	Observe Last Name field	Last Name entered: (empty/not provided)	Last Name should display the entered value; should not be blank if mandatory	Last Name field displayed blank/empty	Fail
TC_bookingconfirm16	Verify Billing Address displayed matches value entered in Book Hotel page	Observe Billing Address field	Billing Address entered: 34535	Billing Address should display the entered value; ideally should validate proper address format	Billing Address displayed as "34535" (numeric value carried through)	Fail
TC_bookingconfirm17	Verify unique Order No. is generated for each booking	Observe Order No. field	N/A	A unique alphanumeric Order Number should be generated and displayed	Order No. "30K3ZQGL4L" generated and displayed	Pass
TC_bookingconfirm18	Verify Order No. remains unique across multiple bookings	Complete two separate bookings and compare Order Numbers	Booking 1 and Booking 2	Each booking should generate a distinct Order Number	(To be verified during execution)	Pending
TC_bookingconfirm19	Verify "Search Hotel" button navigation	Click Search Hotel button	Click "Search Hotel"	User should be redirected to https://adactinhotelapp.com/SearchHotel.php	Redirected to SearchHotel.php successfully	Pass
TC_bookingconfirm20	Verify "My Itinerary" button navigation	Click My Itinerary button	Click "My Itinerary"	User should be redirected to https://adactinhotelapp.com/BookedItinerary.php	Redirected to BookedItinerary.php successfully	Pass
TC_bookingconfirm21	Verify "Logout" button navigation	Click Logout button	Click "Logout"	User should be redirected to https://adactinhotelapp.com/logout.php and session should end	Redirected to Logout.php and session ended successfully	Pass
TC_bookingconfirm22	Verify booking details persist correctly after navigating to My Itinerary	Click My Itinerary after booking confirmation	Click "My Itinerary"	Newly confirmed booking (Order No. 30K3ZQGL4L) should appear in Booked Itinerary list	(To be verified during execution)	Pending
TC_bookingconfirm23	Verify page does not allow duplicate booking submission on refresh	Refresh the BookingConfirm.php page after confirm	Refresh/reload page	System should prevent duplicate order creation or show appropriate warning	(To be verified during execution)	Pending
